

## THE **SPACES** COLLECTION BY HK DESIGNS

We noticed how many recent cool interior designs are featuring slat walls and ceilings and what a powerful impact these have. So we explored the possibility of using this concept for a new range of freestanding furniture, far different to anything HK have designed in the past.

With the current concerns about returning to the office, the Spaces Collection includes some exciting variations to regular office furniture - items that not only address the need for space and distancing but are also designed for flexibility and to help enhance the office environment today and beyond.

The space between slats contributed to the thought process when naming the collection but more relevant is that the products will assist in creating and maintaining comfortable space between users and areas.

## SPACE 2 CREATE

A fluid shaped table that is ideal for co-working, collaboration, creative meetings and responsible breakouts. Measuring 2800mm x 2700mm the table can seat six people comfortably but four is perfect for social distancing.

## SPACE 2 CREATE

The mobile base, highlighted with integral LED lighting, is constructed using shaped slats of oiled birch ply\*1.

The upper slat forms a trough that merges with the table top to create a central showpiece space that is perfect for planting and creating a bit of fun with a variety of scenes, such as a tropical rainforest, desert cacti, woodlands and so on.

The top can come in a choice of sustainable wood veneers, Nature Plus\*2 approved laminates and recycled plastics. Bespoke size tables are available on request.

\*1 Birch trees are a fast-growing species native to northeastern Europe, the abundance and speed of growth of Birch trees means that it causes minimal devastation or destruction of biodiversity when they are cut down, making Birch plywood a sustainable choice that has little impact on the environment.

\*2 The Nature Plus quality mark offers consumers and designers a reliable orientation towards sustainability ie. environmentally friendly and harmless products.

A modern office interior featuring a large, curved desk with a central planter box containing various green plants. The desk is supported by a thick, cylindrical base made of horizontal wooden slats. Several ergonomic office chairs are positioned around the desk. In the background, there is a multi-level seating area with concrete steps and cushions, and a staircase. The space is filled with large windows, providing ample natural light. The overall design is clean, minimalist, and functional.

## SPACE 2 OCCUPY

A sturdy yet elegant mobile screen that is a bit different from the majority of freestanding screens on the market.

It is ideal for creating and changing zones and corridors while at the same time adding to the ambience of open plan working, meeting and breakout areas.

Standing 1800 high x 1200 wide it is constructed using vertical slats that connect into a slim flat base with hidden roller glides. Plant troughs, acoustic panels, notice boards even vertical chess boards can be fitted to either side to add interest, fun and functionality.

The screens are available in natural or stained solid ash as well as a variety of high quality laminates.

SPACE 2 OCCUPY

## SPACE 4 FOUR

A meeting or breakout booth which comfortably accommodates up to four people, providing an element of privacy without the feeling of being boxed in.

Vertical slats, matching the ones on the screens, are used to create the two sides with horizontal slats for the roof.

Plant troughs, signage and notice boards can be hung on the two sides while more planting and lighting can be suspended from the roof. Pull down fabric blinds can be fitted to the sides should extra privacy be required.

The booth sits on a strengthened platform with hidden glides and finished with vinyl tiles on the floor.

Upholstered bench seating is positioned either side of a rectangular table.

Various finishes are available for all parts of the booth.

## GREEN SPACES

The Coronavirus pandemic has thrown our need for nature sharply into focus, bringing a stronger need to work together to overcome the climate crisis. With this in mind The National Trust has a target to plant 20 million trees over the next 10 years.

When a tree is planted, this contributes to reducing emissions; each tree could remove one tonne of carbon from our air over 40 years. These new trees will also open up new habitats for wildlife such as the red squirrel, the hazel dormouse, the greater spotted woodpecker and other birds like the song thrush and the red kite.

We want to help and will have pleasure in donating to The National Trust's 'Plant a Tree' fund every time we receive an order for any product from within the Spaces Collection.
