

AN INTRODUCTION...

QUALITY

'Quality is, of course, of no less importance to us than design, and we have never aimed to produce the cheapest furniture, but to try to make the best at the most reasonable price. There are always ways of reducing costs, but for our own productions we have set ourselves a standard of quality which may not appear cheap at first sight, but which is certainly cheapest in the long run. One lives with one's furniture, and living with quality does seem to contribute to a most desirable and pleasant way of life.'

CONCEPT TO COMPLETION

Send us a sketch and we will do the rest

GREEN SPACES

The Coronavirus pandemic has thrown our need for nature sharply into focus, bringing a stronger need to work together to overcome the climate crisis. With this in mind The National Trust has a target to plant 20 million trees over the next 10 years.

When a tree is planted, this contributes to reducing emissions; each tree could remove one tonne of carbon from our air over 40 years. These new trees will also open up new habitats for wildlife such as the red squirrel, the hazel dormouse, the greater spotted woodpecker and other birds like the song thrush and the red kite.

We want to help and will have pleasure in donating to The National Trust's 'Plant a Tree' fund every time we receive an order for any product from within the HK Collection.
